|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|--|
| Summary   | I am a passionate and motivated learner with a strong foundation in <b>Java</b> , <b>Python</b> , and <b>Data Structures &amp; Algorithms (DSA)</b> . I've built a solid understanding of problem-solving and logical thinking through consistent practice. Currently, I'm expanding my skills into <b>Web Development</b> , exploring front-end and back-end technologies to build real-world applications. |                            |  |
